WORK EXPERIENCE

Senior Software Engineer / PT Toyota Indonesia

January 2022 – Present / Jakarta

- Make document analysis, discuss with a user, advise on the existing system if have a bad performance, stand by and solve existing system if have a problem. Make new features and functions on web and mobile apps. Deploy web and mobile apps.

Founder / PT Baratech Digital Indonesia

January 2021 – January 2022 / Jakarta

- Negotiating with clients involves setting project parameters and fostering a strong working relationship. Meticulous project schedule management ensures transparency and timely delivery for both clients and the team. Effective team management includes role clarification and a collaborative environment to maintain a motivated team. Developing a system based on client requests requires comprehensive design, coding, testing, and incorporating feedback for continuous improvement.

Solution Architect / Fujitsu Indonesia

August 2021 - December 2021 / Jakarta

- Manage Programmer Team and integrated system to external system and manage deployment system to google cloud. Communication and reporting progress of my team to the Project Manager and Team Leader. Develop an application with tech stack .net, java, PHP, kotlin and node.js.

Technical Lead / Fujitsu Indonesia

March 2020 – July 2021 / Jakarta

- Manage Programmer Team and build a standard framework to use in a project. Communication and reporting progress of my team to the Project Manager. Develop an application with tech stack .net, java, PHP, kotlin and node.js.

Software Engineer / Fujitsu Indonesia

October 2018 – March 2020 / Jakarta

- Development web and Android applications for renowned clients like Toyota, Honda, and Otsuka, employing a versatile tech stack (.NET, Java, PHP, Kotlin). Resolved development challenges, conducted code reviews, and ensured optimal performance through SQL Server tuning. Collaborated with cross-functional teams, maintained code quality, and delivered projects on time. Proven track record in enhancing database efficiency and implementing cutting-edge technologies for continuous improvement.

Software Engineer / PT Bee Solution Partners

October 2018 – March 2020 / Bandung

- Developed Telkom applications and outsourcing to Fujitsu Indonesia. Ensured end-to-end software development aligned with Telkom's requirements, emphasizing coding proficiency, problem-solving, and collaborative processes for successful project delivery.

Software Engineer / CV Bima Inspira Master Solution

September 2017 - December 2017 / Bandung

- Developed applications for monitoring air and water quality in Tangerang and Bandung cities. Led the software development, ensuring effective solutions for real-time environmental monitoring in both locations.

Android Developer / PT Gunung Amal Solution

September 2017 - December 2017 / Bandung

- Responsible for developing mobile apps facilitating user services in data validation, synchronization, and registration for Telkom Companies.
